

## The Mission

TAG-Ed's Summer Internship Program provides real-world work experience for high-achieving students with strong STEM aptitude. Students are matched with Georgia companies for paid summer internships, working on projects ranging from website design to social media strategy.

- Internships are five weeks or more, 20-30 hours per week
- Since 2009, we have placed 800+ students in paid internships.
- New for 2017 and exclusive to TAG-Ed applicants, students can apply for a STEAM boot camp! Check out #3 below!

## The Process

- 1 Apply online at [tagedonline.org/programs/tag-ed-summer-internship-program/](http://tagedonline.org/programs/tag-ed-summer-internship-program/)
  - Applications are assessed based on several qualities, including course rigor, volunteer & extracurricular activities, and leadership potential.
  - Note: the deadline to apply is June 12, but students who apply earlier have a stronger chance of being placed.
- 2 TAG-Ed will contact you if you have been matched with a potential host company. You will then interview directly with the company.
- 3 If selected for an internship, TAG-Ed will notify you to schedule a start date with your company's mentor. If you aren't selected, don't worry! TAG-Ed will continue recommending you to potential hosts. Exclusive to TAG-Ed Internship applicants, students can also apply to be considered for the STEAMConcept Bootcamp (see website for more information).
- 4 Interns will participate in an orientation with TAG-Ed before beginning their internships. Upon completion, interns will receive their stipend (\$220 per week)!

Intern placements are typically made from May through the first week of July. Internships are highly competitive, with an annual acceptance rate of 12%.
